CONTENTS

PART 1—JANUARY 1946

PAGE

A revision of the movements of the forearm in tetrapods. By R. Wheeler Haines . 1

Sympathetic rami in man. By J. Pick and D. Sheehan 12

The lymphatics of the synovial membrane. By D. V. Davies 21

An experimental study of the regeneration of mammalian striped muscle. By W. E. Le Gros Clark 24

Quantitative histology of Wallerian degeneration. I. Nuclear population in rabbit sciatic nerve. By M. Abercrombie and M. L. Johnson 37

In Memoriam: Professor E. Barclay Smith (with portrait). G. H. S. Lightoller. J. T. Wilson 51

Anatomical Note 54

PART 2—APRIL 1946

Repair of fractures of the parietal bone in rats. By J. J. Pritchard 55

Migration processes during ontogeny with reference to the venous development in the dorsal body wall. By J. Aüer 61

The early development of the sheep heart. By E. J. Field 75

Correlated changes in nervous tissues in malformations of the central nervous system. By A. Brodal 88

Movements of the first rib. By R. Wheeler Haines 94

Terminal degeneration in the frontal cortex of the rabbit following the interruption of afferent fibres. By P. Glees, A. Meyer and M. Meyer 101

The prescapular lymph node of the ox and its relation to lymphatic drainage of the skin. By W. M. Henderson 107

Anatomical Note 111

In Memoriam: Edwin Stephen Goodrich (with portrait). Professor J. Florian . 112

PART 3—JULY 1946

PAGE

Movements of the tongue in swallowing. By J. Whillis 115

Motor localization and the effects of nerve injury on the ventral horn cells of the spinal cord. By G. J. Romanes 117

Some effects of pituitary adrenotropic hormone (PATH), extract of suprarenal cortex, and colchicine on the haemopoietic system. By J. M. Yoffey and J. S. Baxter . 132

The growth cycle of the cells of the adrenal cortex in the adult rat. By J. S. Baxter . 139

The blood supply and lymphatic drainage of tendons. By D. A. W. Edwards . . 147

The visual paths in a case of unilateral anophthalmia with special reference to the problem of crossed and uncrossed visual fibres. By T. Rogalski 153

The early development of the corpus luteum in the mare. By R. J. Harrison . . 160

In Memoriam: Raoul Anthony 167

John Ernest Sullivan Frazer (with portrait) 168

PART 4—OCTOBER 1946

Studies on the parathyroid of the mouse. 2. Some observations upon the post-natal cytological development of the normal gland, with particular reference to its mitotic activity and Golgi elements. By C. L. Foster 171

Radial hemimelia and the functional anatomy of the carpus. By R. O'Rahilly . . 179

The plane of fracture of the caudal vertebrae of certain lacertilians. By C. W. M. Pratt 184

Spiral nerve endings in the extrinsic eye muscles of man. By P. Daniel . . . 189

Development of the egg of the cow up to the stage of blastocyst formation. By W. J. Hamilton and J. A. Laing 194

A new silver method for staining paraffin sections of the nervous system. By G. J. Romanes 205

A technique for the preservation of animals for the study of joint movement and for routine dissection. By C. W. Ottaway 207

Anatomical Notes:

Patent foramen ovale and ductus arteriosus in a lion cub. By K. J. Franklin . . 209

The laxator tympani muscle. By E. W. Walls 210

In Memoriam: Thomas Hastie Bryce (with portrait) 211

Proceedings 213
